

Find the Solution for the following:

1. What privilege should a user be given to log on to the Oracle Server? Is this a system or an object privilege?

system privilege

2. What privilege should a user be given to create tables?

create table

3. If you create a table, who can pass along privileges to other users on your table?

grant option

4. You are the DBA. You are creating many users who require the same system privileges. What should you use to make your job easier?

use a role

5. What command do you use to change your password?

use password command

6. Grant another user access to your DEPARTMENTS table. Have the user grant you query access to his or her DEPARTMENTS table.

grant select on departments to team2;

7. Query all the rows in your DEPARTMENTS table.

select * from departments;

8. Add a new row to your DEPARTMENTS table. Team 1 should add Education as department number 500. Team 2 should add Human Resources department number 510. Query the other team's table.

insert into dept (dept_id, dept_name) values (500, 'Education');

9. Query the USER_TABLES data dictionary to see information about the tables that you own.

select table_name, tablespace_name, status from user_tables;

10. Revoke the SELECT privilege on your table from the other team.

revoke select on departments from team2;

11. Remove the row you inserted into the DEPARTMENTS table in step 8 and save the changes.

delete from departments where department_id=500;
commit;
